Appropriate responses to transgender persons involved in criminal justice and law enforcement settings: Recent research

**June 25, 10-noon,
University of Richmond Center at 626 East Broad Street, Richmond, 23219**

Experts will present on emerging best practices in clinical care, legal protections, and social understanding regarding management, care, and other responses to transgender persons in criminal justice and law enforcement settings.

Presented by Virginia Anti-Violence Project
With

Eugene F. Simopoulos, M.D., Forensic Psychiatrist, presenting from recent research

Fundamental Principles Inherent in the Comprehensive Care of Transgender Inmates

Eugene F. Simopoulos, MD, and Eindra Khin Khin, MD

The transgender inmate population presents unique challenges and opportunities in medical, psychiatric, and correctional systems of care worldwide. We present a review of both case law and efforts within the medical and psychiatric communities to address transgender needs more consistently over the past few decades. In addition, we discuss the standardized implementation of core principles within the correctional system that should provide comprehensive care to transgender inmates.
